### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

- With regard to independent claim 15, as the closest reference, Albrecht et al (EP 0 690 442 A2) Albrecht et al shows a servo write method for magnetic tape the method, including the steps of: passing the tape over a head surface having a leading edge, the leading edge being disposed adjacent to the head surface such that the tape contacts the leading edge before passing over the head surface; and using the head to write servo position code onto the tape; the head includes: first and second ferrite structures, a non-magnetic material between the first and second ferrite structures to form a spacer, and thereby produce a ferrite-nonmagnetic-ferrite arrangement, and a layer of magnetic material having at least one magnetic gap supported over the non-magnetic material to form the magnetic pattern for writing information to the tape; **but fails to show** that the leading edge is rounded so as to form an air bearing between the head and the tape.
- Applicant asserts a rounded leading edge on the head creates an air bearing to reduce wear of the tape and of the head (Specification, p. 3).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
